Avatar uploader	avatar uplodader	5 Makes avatar uploader working.
		5
D	annata hannada	The barcodes are now using real case-related data. There was a lot of re-structuring
Barcode Barcode	create barcode create barcode	7 necessary, in order to make this working fluently. 8.5 Generating barcodes in SVG format based on test data.
Sarcode	create parcode	15.5
Documentation	Setting up new git repository for documentation	0.5 Repository available at https://github.com/benoertel/unplagged-documentation
	Create papers, broschures, nametags, presentation for	, , , , , , , , , , , , , , , , , , ,
Documentation	showtime.	7 Printing all the stuff at dbusiness and kopierladen
	Create papers, broschures, nametags, presentation for	
Documentation	showtime.	4.5 Creating impress presentation
	Create papers, broschures, nametags, presentation for	
Documentation	showtime.	15.5 Technology poster, General poster, nametags, some improvements on the broschur
	Create papers, broschures, nametags, presentation for	
Documentation	showtime.	6 I crated a nametag layout, a first draft of the trifold broschure and an A0 logo file.
Documentation	impress is Showtime presentation	5 Working at the impress presentation for the Showtime
Documentation	impress.js Showtime presentation	5.5 Working at the impress presentation for the Showtime
Documentation	Documentation version 2	4 Writing at chapter barcode, fragments and plagaware.
Documentation	Documentation version 2 Documentation version 2	3 Writing at chapter fragments and activity stream.1 Meeting for documentation version 2.
Documentation		
Documentation Documentation	Documentation version 2	2.5 Writing at chapter activity stream
	Documentation version 2 Documentation version 2	1 Creating timelog sheet 3 Writing chapter roles and permissions
Documentation Documentation	Documentation version 2 Documentation version 2	0.5 Proof reading
Jocumentation	Documentation version 2	59
	Implementing Sim-Text in PHP based on the Javascript	Some refactoring of the simtext code into the appropriate directories and minor
Documents	version	2 modifications.
Documents	Parsing mulitple-page documents should be possible	3 Cron job setup on server.
	6	Identifying issues with wrong bit depth of imagemagick output files, updating parser to
		work with multiple pages, identifying and fixing local problem with imagemagick not
Documents	Parsing mulitple-page documents should be possible	5 parsing pdfs properly
		The response page is now added to the acl of allowed actions for guests and the input
Documents	Plagiarism detection not working anymore.	1 params are not choked anymore.
Documents	"Select all" for checkboxes in dehyphen area.	0.5 Changed style for selecting/ unselecting all lines in a page.
Documents	"Select all" for checkboxes in dehyphen area.	1.5 Beautifying dehyphen form
	Remove bibtex from and new document option from	
Documents	fragment form	1 BibTex field was removed from fragment form and moved to document form.
		Saving pages in single lines, modifying simtext to support the new page model with single
Documents	Save pages in single lines	16 lines.
Documents	Parsing of .txt files	1 Txt files can be parsed now.
Documents	Optimizing the storage of BibTex information	7.5 Several improvements for the bibtex part of the application.
Documents	Documents can be crated by hand as well	1 Documents can be added through a form and not through parsing only.
		39.5
iles	Downloading files and viewing images not working anymore	
		2
	A command of the comm	Fixing bug where hidden bibtex information did not stay hidden when the form was
ragments	A user can create a fragment by hand	0.5 displayed with errors after a submit.
ragments	A user can create a fragment by hand	2.5 Adds option for editing a fragment and restructures the edit/creation process.
Fragmonts	Aucor can create a fragment by hand	A user can choose from existing documents or create a new one during fragment creation
Fragments	A user can create a fragment by hand	4 many improvements in the interface.
Fragmonts	Aucor can create a fragment by hand	Adding bibtex information to fragment, implementing the single fragment page view with
Fragments Fragments	A user can create a fragment by hand	4.5 plagiarism text and source text, several changes to the internal fragment structure. 4 Initial fragment model structure
Fragments	A user can create a fragment by hand A user can select a fragment by selecting a part of an ocr	- mittai magment model structure
Fragments	scanned document	2 A user can select a part of the document page and then create a fragment
	A user can select a fragment by selecting a part of an ocr	2 / Auto- can select a part of the document page and then create a magnificht
Fragments	scanned document	3.5 Trying to fix a problem with fragment deletion when deleting a page.
-	A user can approve/decline a fragment	3.5 The ratings are now in the conversation stream as well.
-ragments		
-	A user can approve/decline a fragment	4 Basic tragment approval/decline implementation
ragments	A user can approve/decline a fragment determine document/fragment per case	Basic fragment approval/decline implementation Fragments, reports and documents are now case-related.
Fragments Fragments	determine document/fragment per case	3 Fragments, reports and documents are now case-related.
Fragments Fragments
